The next generation of health care is already began, at Deborah.
It's sare-ang. World-class healing and preventative care are happening right here, in your backyard.
Because of an ala bacalinary, multi-year, multi-mill ion dollar investment in their patients, Deborah's nationally recognized cardiac, vascular and pulmonary programs have taken another leap forward. It's one of the main reasons why patients here and across the region insist on the Deborah standard of care.
From keeping hearts and lungs strong and healthy to diagnosing and treating vascular challenges from simple to complex, Deborah's team of specialists and nurses form an unbroken circle of protection for patients and their families—saving and extending life is their driving passion. When it comes to your family's health security never compromise. Demand Deborah.

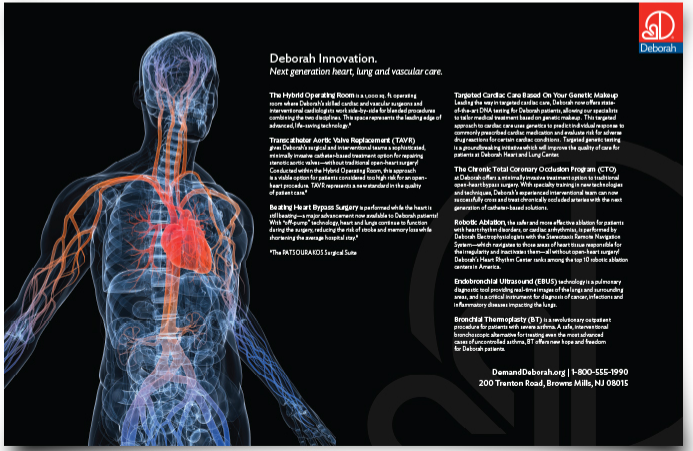
INNOVATORS IN HEALTHCARE AWARD
$1.1 Billion



Deborah
Deborah Innovation.
Next generation heart, lung and vascular care.
The Hybrid Operating Room is a 1,000 sq. ft. operating room where Deborah's skilled cardiac and vascular surgeons and interventional cardiologists work side-by-side for blended procedures combining the two disciplines. This space represents the leading edge of advanced, life-saving technology.*
Transcatheter Aortic Valve Replacement (TAVR) gives Deborah's surgical and interventional teams a sophisticated, minimally invasive catheter-based treatment option for repairing narrowed aortic valves—without traditional open-heart surgery! Conducted within the Hybrid Operating Room, this approach is a viable option for patients considered too high risk for an open-heart procedure. TAVR represents a new standard in the quality of patient care.*
Beating Heart Bypass Surgery is performed while the heart is still beating—a major advancement now available to Deborah patients! With "off-pump" technology, heart and lungs continue to function during the surgery, reducing the risk of stroke and memory loss while shortening the average hospital stay.*
*The PATSOURAKOS Surgical Suite
Targeted Cardiac Care Based On Your Genetic Makeup
Leading the way in targeted cardiac care, Deborah now offers state-of-the-art DNA testing for Deborah patients, allowing our specialists to tailor medical treatment based on genetic makeup. This targeted approach to cardiac care uses genetics to predict individual response to commonly prescribed cardiac medication and evaluate risk for adverse drug reactions for certain cardiac conditions. Targeted genetic testing is a groundbreaking initiative which will improve the quality of care for patients at Deborah Heart and Lung Center.
The Chronic Total Coronary Occlusion Program (CTO)
at Deborah offers a minimally invasive treatment option to traditional open-heart bypass surgery. With specialty training in new technologies and techniques, Deborah's experienced interventional team can now successfully cross and treat chronically occluded arteries with the next generation of catheter-based solutions.
Robotic Ablation, the safer and more effective ablation for patients with heart rhythm disorders, or cardiac arrhythmias, is performed by Deborah Electrophysiologists with the Stereotaxis Remote Navigation System—which navigates to those areas of heart tissue responsible for the irregularity and inactivate them—all without open-heart surgery! Deborah's Heart Rhythm Center ranks among the top 10 robotic ablation centers in America.
Endobronchial Ultrasound (EBUS) technology is a pulmonary diagnostic tool providing real time images of the lung and surrounding area, and is a critical instrument for diagnosis of cancer, infections and inflammatory diseases impacting the lungs.
Bronchial Thermoplasty (BT) is a revolutionary outpatient procedure for patients with severe asthma. A safe, interventional bronchoscopic alternative for treating even the most advanced cases of uncontrolled asthma, BT offers new hope and freedom for Deborah patients.

SADDLE RIVER, NEW JERSEY
Dear Neighbor,
It's been the privilege of my life to serve as your mayor. With gridlock and civility almost disappearing from our national conversation, it's encouraging to see the real good that happens when people put aside self interest to seek the common good. Instead of tearing each other down, many people of this extraordinary community have been working together to do great things.
I can't begin to tell you how thankful I am to have had your support on so many important initiatives during the course of our two terms. You've asked the right questions, demanded accountability and expected results. We proved that when the people stay informed and engaged government works.
Today, Saddle River, New Jersey can be proud of the community we're building for this generation and the next. Because of your support, we're a safer, cleaner place to live, work and raise a family. It wouldn't have happened without you.
It's with a full heart and deep sense of satisfaction that I'm announcing that I will not be seeking a third four-year term in next year's primary and general elections. Public service is a temporary trust that needs to be constantly renewed and refreshed. It's time to extend the call to a new leadership team committed to building and protecting all we've achieved together.
As I complete the next and final lap in my service as your mayor, please know how thankful I am for believing that Saddle River, New Jersey is one special community. The best is still to come.
With appreciation I remain yours truly,
Sam

TOGETHER WE'VE DONE GREAT THINGS.
SADDLE RIVER: STRONGER, SAFER, BETTER.
FIRST AID
Cleaned up and planted the approaches to Route 17.
Brought paramedics to Saddle River, stationed in our firehouse.
Brought a Valley Hospital ambulance to Saddle River, stationed in the Saddle River firehouse.
Added a landscape architect to the planning and boards to maintain the bucolic nature of our town.
No Nimbyism! no increase for three—soon to be four—years of an increase.
Sought out and received over $1 million in grant money.
Completed the new master plan for Saddle River, previously stalled for over 10 years.
Designated the center of Saddle River as our Saddle River Crossing Area—a blueprint for our town center that permanently preserves our historic charm.
Dramatically improved transparency by developing the mayorsamraia.com website for frequently asked questions.
Reconstructed islands at Cameron Road with paving brick and tree plantings.
Invested over $500,000 on police technology.
Aggressively continued our fire safety waterline system, now 85% completed.
Added several safety and security cameras tied into the police station to keep Saddle River a safer community.
Created a four-way stop at Woodcliff Lake and Chestnut Ridge Road and a traffic light at Berdine Road.
Increased Police Department staffing by a total of 10 police officers, including our community's first female officer.
Connecting security cameras at Woodcliff School into the police station.
Improved police and cell communications with a replacement cell tower at no cost to the borough, while collecting income from T-Mobile and AT&T that will soon to exceed $50,000 per year. These dollars are dedicated to supporting the night duty program at the firehouse.
Provided a needed resource officer at Wandell School and Saddle River Day School.
Completed major improvements to the Wandell School fields.
With 100% state grant money, improved the streetscape along E. Allendale Road in front of Wandell School.
Received a second grant for 100% of the cost from the state to improve the streetscape on E. Allendale Road down to E. Saddle River Road. A total of over $350,000 in state money.
Installed license plate readers in the police cars for instant identification of criminals.
Developed the entire Saddle River from the Upper Saddle River border through Hollis Ln.
Delivered a historic, rapid recovery of Saddle River in the aftermath of Hurricane Sandy, well before our neighboring communities.
Each year allocated over $250,000 for work and services at the Wandell School so that Board of Education money can be used to increase investment in education.
Built up our reserves to over $1,000,000.
Reduced Saddle River's debt by over $1,000,000.
Purchased hybrid vehicles for our fire and construction departments.
Improved the exterior of the Saddle River Museum.
Constructed a band shell in Rinaldi Field for our "concerts in the park" series.
Dramatically reconstructed and improved each field for sporting activities at Rinaldi Field.
With grant money, constructed a shelter area for our children in case of a lightning storm at Rinaldi while renovating the softer field house with grant money.
Increased parking at Rinaldi Field so that all cars can park in the immediate area of the sports fields with over $1.2 million of County grant money while improving access for emergency vehicles.
Acquired almost 3 additional acres for added open space at Rinaldi per the Master Plan, with 75% being paid by the county.
Improved drainage and water absorption on all new construction sites by reducing run off by some 50% while increasing the volume of water going into the aquifer.
Completed several labor contracts with police and public employees with results well within the Governor's 2% cap.
Developed a second tier pay scale for newly hired police officers.
